SECTION 2. . NON FARM-BASED PRODUCER VALUE ADDER

This questionnaire requires detailed information on the source of all raw products and ingredients used in value added products.

Water is not considered as an ingredient for the purposes of calculation of the origin score. Ingredients that cumulatively constitute less than 5% of a product, such as all the spices together in a sausage, do not require disclosure of origin. For clarification, a curry powder consisting of more than 5% spice would require disclosure of origin of the spices as they are a key or defining ingredient.
